Faculty of Applied Science

COVID-19 Building (Common Areas) Safety Plan

This Building Safety Plan will be developed by Local Safety Teams, and approved by Unit Heads/Directors. This plan will include a review of common areas to ensure effective controls are in place to prevent the spread of COVID-19. This document must reflect current government guidance and notices which can be found, along with information about UBC’s response to the pandemic at https://covid19.ubc.ca/.

Name of Building: Civil and Mechanical Engineering Building
Address of Building: 6250 Applied Science Lane

Introduction
This plan covers entryways, hallways, elevators, stairwells, bathrooms, and lobbies in the CEME building.

Reference Documents:
The following guidance documents and resources on the were used in the development of this plan:

- Preventing Exposure
- Personal Protective Equipment
- Physical Distancing Guidelines
- Reporting COVID-19 Exposure
- Communications Resources
- UBC COVID-19 Campus Rules
- Guidelines for Safe Washroom Occupancy
- Building Operations Faculty Notice – Cleaning

General Procedure:

UBC Guiding Principles apply at all times:

1. Anyone who is ill or has symptoms of cold or flu will not come to work on UBC campus. They will work at home if well enough, access sick leave if available or arrange an unpaid leave of absence with their supervisor or manager.
2. Anyone who had a positive COVID-19 diagnosis will only return to work on campus after they have fully recovered.
3. Anyone who has travelled or had contact with a possible COVID-19 infected person or area will work from home for 14 days and only return to work on campus if fully asymptomatic.
4. Everyone will practice good hygiene including frequent handwashing, avoiding touching their face, coughing into their sleeve and avoiding touching surfaces or other people.
5. Everyone will regularly clean the frequently touched surfaces in their workspaces.
6. Everyone will maintain a physical distance of 2 metres from others as much as possible.
7. Meetings will be conducted by phone or video conferencing unless the 2 metre distance between participants can be complied with.
8. Everyone will follow relevant signage and floor markings when moving around campus spaces and buildings.
9. Everyone will complete the mandatory online training module ‘Preventing COVID-19 Infection in the Workplace’ within 30 days of returning to campus.
10. Everyone will familiarize yourself with the COVID-19 Safety Plans approved for your work areas – these will layout the plan for occupancy, traffic flow and hygiene at your worksite and within your building respectively.

APSC Faculty Principles apply at all times

1. Opportunities to return to research will be implemented with a fair, equitable approach that strictly adheres to Provincial guidelines.
2. APSC acknowledges that the circumstances surrounding COVID-19 affects different people to different degrees, some disproportionately, and seeks to provide an equitable return to research.
3. A return to research sites will be only as necessary. Many research activities will continue to operate remotely, including manuscript preparation, meetings with lab groups, teams and graduate students.
4. Authorization will be required to restart research activities (the default is to continue under the current curtailment program).
5. Certain forms of research must be considered separately given their specific features and different public health dimensions, including laboratory sciences, field work, human subject research, as well as plant and animal care.
6. Access to research spaces must be planned in conjunction with a range of campus services to allow for appropriate cleaning, safety and security.
7. Any return to research at UBC will need to be calibrated within the wider provincial context with respect to supply chains and access to PPE.
8. While wage continuity for student trainees and staff on research funds should be encouraged, as well as graduate student research and thesis completion, no students or staff should be obliged to work in conditions they consider unsafe.
9. Any worker (staff, students, faculty, post-docs, research associates, technicians, and other research personnel) who feels uncomfortable or unsafe to work on campus can apply for an exemption to his/her supervisor.
10. Zero tolerance: deviations from the guidelines will result in removal of the authorization to operate

Before traveling to campus

1. All work that can be done remotely must be done remotely. For example, data processing, writing manuscripts, creating presentations, studying, online library research, computations, should be done from home.
2. Before coming to work, all staff, research personnel, teaching personnel and trainees must check their health status. Personnel experiencing any symptoms of COVID-19 (cough, sneezing, shortness of
breath, loss of sense of smell/taste, sore throat, tiredness, fever) must not come to work and should contact a health care provider. The BC Health Self-Assessment tool can be used to determine if you require further testing or medical care: https://bc.thrive.health/.

3. Individuals displaying symptoms of COVID-19 (described above) must remain at home and isolated for at least 14 days. Personnel who have been in contact with a person confirmed or presumed to have COVID-19 must also self-isolate.

Note: Supervisors cannot require trainees to work under conditions in which they feel unsafe. If you feel unsafe, contact the graduate advisor or Head and do not report to work.

Should your area periodically need to be serviced by custodial services or similar, we ask you to please move out of the immediate area to ensure that social distancing and the safety needs of these workers can be met.

**GETTING TO WORK**

Private methods of transportation are preferred – free parking permits are available through to the end of August 2020, visit parking.ubc.ca. Where proximity allows, biking and walking may be good options. If you need to take transit, try your best to maintain social distancing at all times and follow hygiene recommendations (hand washing, use of hand sanitizer etc.).

WORKING hours are limited to shifts between 7:00 am – 6:00 pm Monday to Friday.

**CEME Specific General Procedures:**

- Traffic flow through the building will be controlled by encouraging the one-way use of hallways where possible. See map in the Appendix.
  - Flow on the first floor:
    - East wing door to lobby (west)
    - Lobby door to connection to KAIS (west)
    - Lobby door to south door (south)
  - Vertical flow:
    - Lobby stairs – up
    - South wing, west wing, east wing stairs – down
    - Elevator – single occupancy; use for mobility or heavy loads only
  - Flow on second floor:
    - Lobby to east wing door (east)
    - Lobby to west wing door / connection to KAIS (west)
    - Lobby to south wing door (south)
  - Directional arrows will be applied with tape on the ground
  - Directional signs where needed

- Bathrooms
  - Signed for single use (all bathrooms in building other than those already single use)
  - Waiting locations to be marked in hallway, 2 m from door
  - Handwashing signs posted

- Kitchens
  - Refrigerators and microwaves marked “Do not use”
  - Sinks remain open for handwashing
COVID-19 Safety Plan Template

- Handwashing signs posted
- Notice to be posted that water should not be used for drinking at this time

- Building sanitation will be per Custodial Services
- PPE not required in building in general, but non-medical masks are a personal choice
- Lobby seating to be restricted to occupancy 1 at the white tables and occupancy 2 at the sofas
- Lunch rooms, grad lounge, undergraduate lounges, and NAME lounge areas closed

Common Area Plans:
The following common area safety plans must be followed:

Bathrooms:
- Signed for single use (all bathrooms in building other than those already single use)
- Waiting locations to be marked in hallway, 2 m from door
- Handwashing signs posted
- “Please knock before entering” sign to be posted on all doors

Hallways:
- Traffic flow through the building will be controlled by encouraging the one-way use of hallways where possible. See General Plan.
- When one-way traffic is not possible, walk on the right. Yield to oncoming traffic.

Entrances/Exits:
- At the lobby entrance, automatic door openers should be used (use elbow to activate). At the east entrance, immediately wash hands after entering the building.
- Once research has started, the security lockdown that closed interior doors will end, and doors will be opened onto their magnetic door openers. Note that fire doors should not be propped.

Elevators:
- Elevator – single occupancy; use for mobility or heavy loads only
- Immediately wash hands after exiting the elevator (using lobby bathrooms)

Stairwells:
- Lobby stairs will be reserved for those travelling up
- South wing, west wing, east wing stairs are reserved for those travelling down
- Please be patient; do not pass anyone on the stairwells

Lunch rooms & Kitchen:
- Refrigerators, microwaves, and coffee machines to be marked “Do not use – kitchen closed until further notice”
- Shared dished marked “Do not use – kitchen closed until further notice”
- Sinks remain open for handwashing
- Handwashing signs posted
- Notice to be posted that water should not be used for drinking at this time
- Lunch rooms / lounges closed in Phase 1

Communications Plan
- Common email to all Mech and Civil faculty, staff, and student employees
- Signage to be posted per other sections
• Posted to Mech and Civil webpages
• Reminder email with each research exemption approval
• Notices regarding the safety protocols will be posted at entrances and community areas like lunchrooms for all workspaces.

Monitoring
• Scott Jackson is responsible for monitoring
• Mech will appoint assistant monitors once research resumes
• All faculty, staff and students are encouraged to bring concerns about the operation of the safety protocols or incidents of non-compliance to the attention of the Administrative Head of Unit or designate.
• Failure to follow these safety protocols may result in discipline up to and including the termination of employment.
• Working alone will require a buddy system check-in/check-out (via email / text / IM).
• All need to be aware of fire safety as many floor wardens will not be returning to campus.
