Graduate studies at UBC’s Department of Mechanical Engineering

Why Mechanical Engineering at UBC?

**STRONG RESEARCH**

UBC Mechanical Engineering is one of the most active research departments in Canada, with 34 research faculty, four Canadian Research Chairs, and over $10 million in annual research funding. Our faculty are recognized nationally and internationally as leaders in their fields: many hold prestigious Fellowships and are affiliated with distinguished research institutes.

**WORLD-CLASS EDUCATION**

UBC is ranked among the world’s top 40 universities, and among the world’s top 20 public universities. Our faculty have received numerous awards and distinctions for their scholarly activity, professional activities, service, and teaching. Our beautiful campus is located in temperate Vancouver, British Columbia constantly ranked as one of the most livable cities in the world.

**COMPETITIVE FUNDING**

We are committed to providing funding to MASc and PhD students in the form of Research Assistantships, scholarships, and top-ups to external awards. Most MASc and PhD students receive competitive funding packages. MEng and MEL students may be eligible for program-specific scholarships and industry-sponsored awards. The department also offers a number of Teaching Assistant positions that are open to all graduate students.

---

Options to fit your goals

Mechanical Engineering offers research-based MASc and PhD degrees in Mechanical Engineering, as well as professional (industry-focused) MEng and MEL programs for those who would like to further their studies without pursuing research.

We have four research groups and four professional program options.

**RESEARCH GROUPS**

- Biomedical Engineering
- Design & Applied Mechanics
- Mechatronics & Manufacturing
- Thermo Fluids

**PROFESSIONAL OPTIONS**

- Naval Architecture & Marine Engineering (NAME)
- Mechatronics Design
- Clean Energy Engineering
- Mechanical Engineering
Our Programs

We offer four graduate programs in Mechanical Engineering:

Admission Requirements

**MEng/MEL/MASc**
Domestic applicants for a master’s degree program must hold the academic equivalent of a four-year bachelor’s degree from UBC with one of the following:
- A minimum overall average of B+ (76% at UBC) in third- and fourth-year courses; or
- At least 12 credits of third- or fourth-year courses in the A-grade range (80% or higher at UBC) in the field of study.

Note: MEL applicants also require a minimum of three years of industry experience.

In exceptional cases, students who have not yet completed a master’s program but who hold an undergraduate degree may be admitted.

---

**PhD**
Domestic applicants for the Doctor of Philosophy (PhD) program must have:
- A master’s degree (or equivalent) from an approved institution; and
- Clear evidence of research ability or potential

For international applicant requirements, visit the Graduate & Postdoctoral Studies website at grad.ubc.ca.

How to Apply

Start your application now. Visit mech.ubc.ca/graduate/applications for information on application instructions, deadlines, and requirements.

"UBC Mechanical Engineering is not just another department; it’s a tight-knit community of individuals who are passionate about their work...By doing my post-graduate studies here in UBC Mechanical Engineering, I believe that I have been provided with all of the resources and the latitude needed to succeed as a student and researcher."
